Data & Operations-focused Project Manager building automated data pipelines, dashboards, and reporting workflows with Python, SQLite, and Power BI across engineering teams at Disney, Toyota, and Tesla.

SKILLS

Data & Analytics: Python, SQLite, Power BI, Power Automate, Airtable, Data Visualization, Excel (VLOOKUP, Pivot Tables, Goal Seek)

Project & Process: Jira, Six Sigma, Primavera P6, ERP/PLM Systems

Engineering & Design: FlexSim, MATLAB/Simulink, FEA/CFD, SolidWorks, AutoCAD, BIM, React

Certifications: Talking to AI: Prompt Engineering for PMs (PMI), AI Foundations (ISTE/IBM), Machine Learning with Python

EXPERIENCE

Walt Disney Imagineering | Glendale, CA

Associate Project Manager (promoted from Project Management Intern) | Jan 2025 – Present

- Built Power BI and Airtable dashboards to model demand, risk, and milestone tracking, increasing stakeholder visibility 75%.
- Automated Airtable workflows and stakeholder reporting using Python and Power Automate, cutting manual reporting by 40%.
- Managed project data across ERP/PLM and Primavera P6 systems to run design reviews, schedules, budgets, and deliverables.
- Aligned 5+ departments across creative and engineering with structured FigJam process diagrams, improving coordination 20%.

Woven by Toyota | Tokyo, Japan

Systems Engineering Intern | Jun 2024 – Aug 2024

- Automated a pipeline converting PlantUML architecture designs into MBSE-based UML/SysML models using Java, HTTP, and Visual Studio, enabling rapid design validation.
- Built a unified MBSE system model, running simulations to forecast efficiency, adaptability, and safety, and to verify and validate architecture designs.

Tesla | Austin, TX

Material Flow Automation Engineering Intern | Jun 2023 – Aug 2023

- Built assembly line and value stream maps in FlexSim, running capacity simulations that cut cycle time 15% and costs by \$57.6K.
- Directed installation planning using FlexSim simulation data, validating results on-site to accelerate installs by 3-4 days.
- Prepared RFQs/POs and coordinated validation, testing, and design timelines across teams and vendors.
- Led virtual commissioning and factory layout optimization — technical documentation, procurement, and change orders across production, supply chain, and construction teams.

Manufacturing Engineering Intern | Jan 2023 – Jun 2023

- Built a cost-saving solution (35-45%) using SQLite, LINQ, and C# integrated with AutoCAD and SharePoint Excel.
- Applied GD&T, BOM management, and design-for-manufacturability principles in SolidWorks.

ADDITIONAL EXPERIENCE

App & Web Development Projects | Jan 2022 – Present

- Built scalable data management using Google Authentication, Zustand, and TanStack Query with an Appwrite backend.
- Applied clean architecture, reusable hooks, and CI/CD pipelines for scalable deployment.

Texas Guadalupe, President | Austin, TX | Mar 2023 – Sep 2024

- Built and presented timelines, milestones, budgets, and resource plans that raised \$33K.
- Implemented safety protocols for all team members.

EDUCATION

The University of Texas at Austin | Dec 2024

Bachelor of Science, Chemical Engineering (Honors) | Certificate, Elements of Computing | GPA: 3.7/4.0

Relevant coursework: Elements of Data Analytics & Data Visualization, Elements of Software Design, Foundations of IT Management
